

WORKING TOGETHER TO CONNECT CARE (WTTCC)

The purpose of WTTCC is to take a more collaborative approach to providing case management and psychosocial support to individuals who frequently present to The Royal Brisbane & Women's Hospital and The Prince Charles Hospital Emergency Departments.

The aim of the WTTCC program is to provide recovery orientated, strengths based supports to increase independence, resilience and to reduce presentations and admissions to Emergency Departments.

Footprints works alongside the individual to develop their own case plan and works on targeted strategies and provides care coordination in the community. The WTTCC team collaborates with the Hospitals and current stakeholders to ensure the individuals needs and goals are met.

REFERRAL PATHWAYS

All referrals are received from The Royal Brisbane & Women's Hospital and The Prince Charles Hospital Emergency Departments.

WTTCC OFFERS:

Recovery based non-clinical case management.

Collaborative psychosocial support.

Supports individuals to access services, that enhance responsibility and self-management of multiple complex health conditions.

Empowers individuals to be a part of their own recovery and eliminates barriers to accessing Primary Care Services.

Provides flexible service delivery and outreach supports.

Please contact Footprints if you wish to speak to someone in our team.
